

expandAndScrollToElement

jQuery

```
graph LR; A[expandAndScrollToElement] --> B[jQuery]; B --> A;
```

The diagram illustrates a bidirectional relationship between two components. On the left is a gray rectangular box with a black border containing the text 'expandAndScrollToElement'. On the right is a white rectangular box with a red border containing the text 'jQuery'. Two dark blue arrows connect the boxes: one points from the gray box to the white box, and the other points from the white box back to the gray box, indicating mutual interaction or dependency.
